FEATHERLITE TRAILER, CUSTOM R22 HELICOPTER TRANSPORTER SYSTEM

Custom R22 Helicopter Transporter System Trailer: Custom trailer by Featherlite The transporter is basically a tarp-covered wagon with a moveable scissors lift. 10-foot flatbed and tilting 5th-wheel hitch on long frame rails 160 gallons 80 each side, air dryer and chuck, grate steps Verduyn tarp with quadruple uplift bows for no blade contact 3 kW Honda generator and batteries to operate scissors lift independently of truck Landing platform large enough for the average pilot, with tie downs. After opening the rear doors and loosening two tensioning brackets, the tarp slides forward and compresses into the fifth-wheel area. Controller for landing platform directs up, down, forward and reverse movement from right side, with full visibility Rack and pinion transport drive for scissors lift, moves platform fore and aft along tracks. Landing pad wings open, and rest on solid trailer base. Manual override, so if electricity fails we can still move the landing platform. Durable rubber material on landing platform (also used in horse trailers). Two compartments designed to hold large helicopter fuel bladders Two large tie-down straps securing the platform to the trailer Smaller straps hold the helicopter to platform Robinson tuna-boat blade supports, front and rear protect droop stops The system provides a very soft and secure ride for the R22.
